3. Execute and Display the Results of the Following Commands in Kali Linux Operating Systems

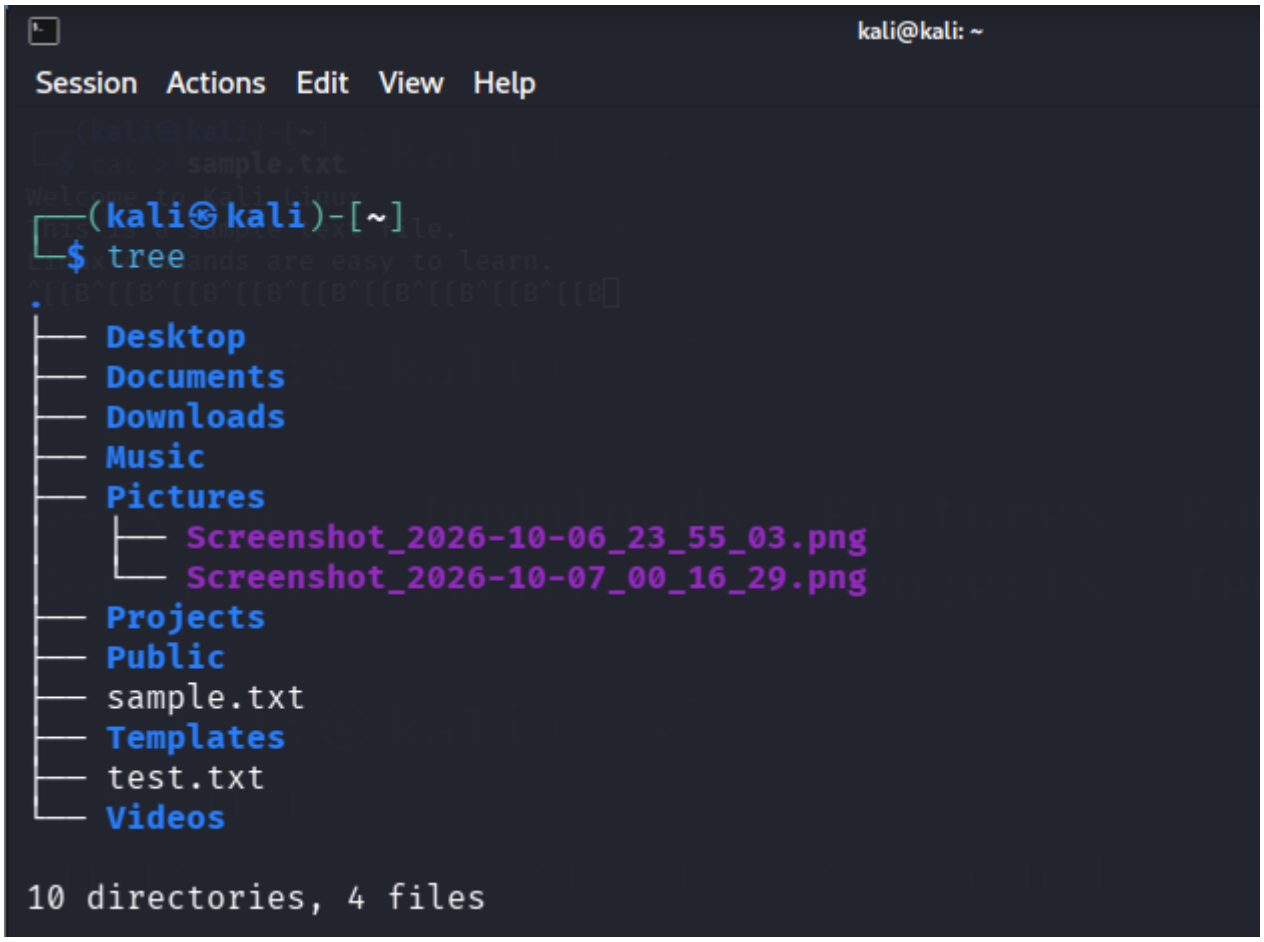

1. tree Command

Use of Command:
The tree command is used to display files and directories in a **tree-like hierarchical structure**.

Aim: To display the directory structure of the current directory.

Command:

Tree

Output:

.

├── Desktop

├── Documents

├── Downloads

| ├── file1.txt

| └── file2.txt

├── Music

├── Pictures

└── Videos

6 directories, 2 files

Result: The tree command successfully displayed the files and directories in a tree-like structure.

---

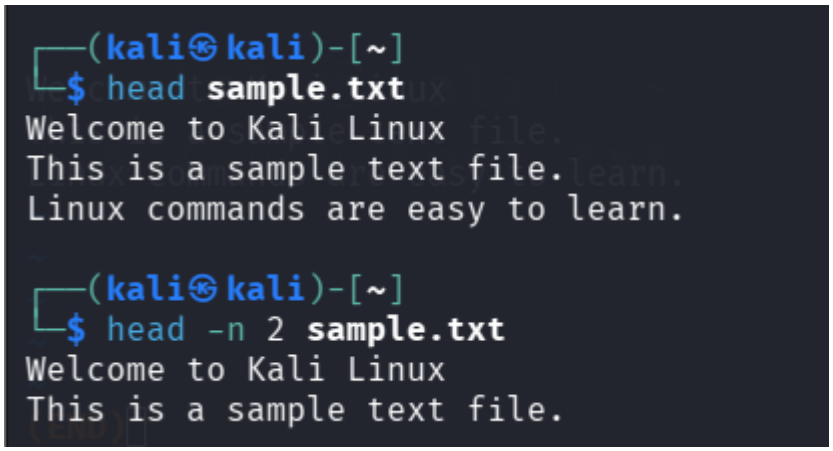

2. head Command

Use of Command:
The head command is used to display the **first few lines of a file**. By default, it displays the first **10 lines**.

Aim: To display the first few lines of a file.

Command:

head sample.txt

Output:

Welcome to Kali Linux

This is a sample text file.

Linux commands are easy to learn.

Result: The head command successfully displayed the beginning of the file.

To display only the first 2 lines:

head -n 2 sample.txt

Output:

Welcome to Kali Linux

This is a sample text file.

---

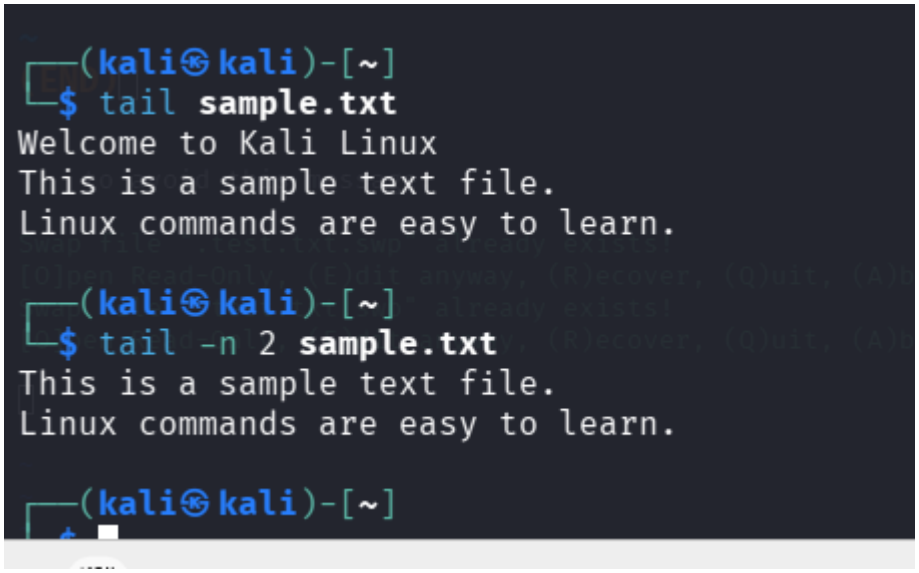

3. tail Command

Use of Command:
The tail command is used to display the **last few lines of a file**. By default, it displays the last **10 lines**.

Aim: To display the last few lines of a file.

Command:

tail sample.txt

Output:

Welcome to Kali Linux

This is a sample text file.

Linux commands are easy to learn.

Result: The tail command successfully displayed the end of the file.

To display only the last 2 lines:

tail -n 2 sample.txt

Output:

This is a sample text file.

Linux commands are easy to learn.
