5. Execute and Display the Results of the Following Commands in Kali Linux Operating Systems

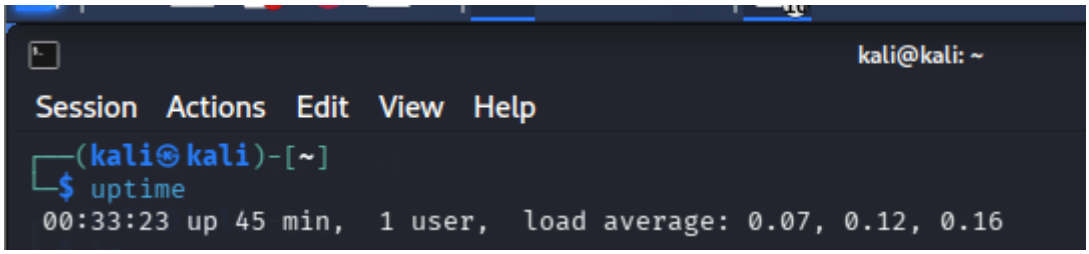

i) uptime Command

Use of Command:
The uptime command is used to display **how long the system has been running**, the current time, number of logged-in users, and system load.

Aim: To display the system uptime and load information.

Command:

Uptime

Output:

09:30:15 up 2 hours, 15 min, 1 user, load average: 0.12, 0.10, 0.08

Result: The uptime command successfully displayed the system running time, logged-in users, and system load.

The output will be different on your Kali Linux system depending on when you run the command.

---

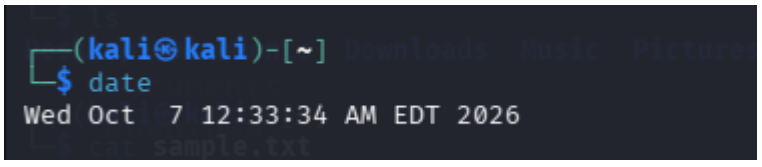

ii) date Command

Use of Command:
The date command is used to **display the current date and time** of the system.

Aim: To display the current system date and time.

Command:

Date

Output:

Wed Oct 7 09:30:20 AM IST 2026

Result: The date command successfully displayed the current date and time.

The date and time will automatically change according to your system.

---

iii) mv Command

Use of Command:
The mv command is used to **move or rename files and directories**.

Aim: To rename a file using the mv command.

First, create a file:

touch oldfile.txt

Rename the file:

mv oldfile.txt newfile.txt

Check the result:

Ls

```
┌──(kali㉿kali)-[~]
└─$ touch oldfile.txt
┌──(kali㉿kali)-[~]
└─$ mv oldfile.txt newfile.txt
┌──(kali㉿kali)-[~]
└─$ ls
Desktop    Downloads  myfolder     Pictures  Public      Templates  Videos
Documents  Music      newfile.txt  Projects  sample.txt  test.txt
```

Output:

Desktop Documents Downloads newfile.txt Music Pictures Videos

Result: The mv command successfully renamed oldfile.txt to newfile.txt.
