6. Execute and Display the Results of the Following Commands in Kali Linux Operating Systems

i) touch Command

Use of Command:
The touch command is used to **create a new empty file** or update the date and time of an existing file.

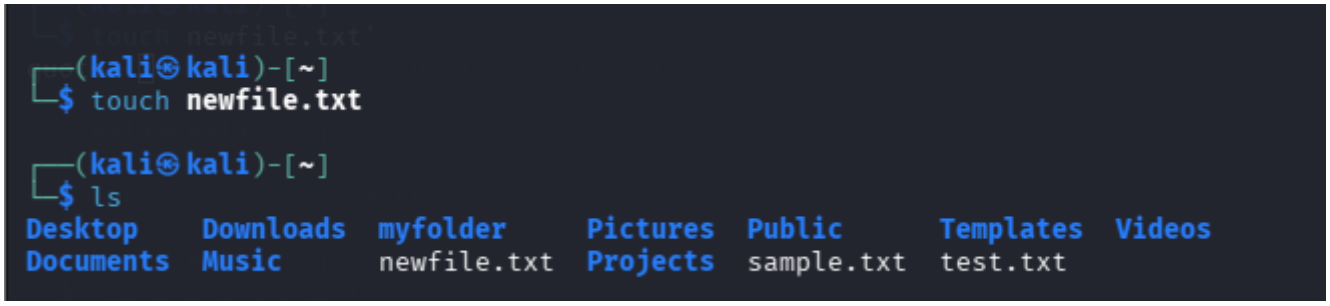

Aim: To create a new file using the touch command.

Command:

touch newfile.txt

To check whether the file was created:

Ls

Output:

Desktop Documents Downloads Music Pictures Videos newfile.txt

Result: The touch command successfully created an empty file named newfile.txt.

---

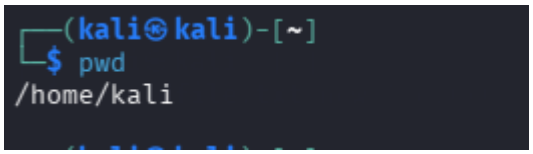

ii) pwd Command

Use of Command:
The pwd command is used to **display the present working directory**, that is, the location of the directory where you are currently working.

Aim: To display the present working directory.

Command:

Pwd

Output:

/home/kali

Result: The pwd command successfully displayed the current working directory.

Your output may be different depending on the user account and directory.

---

iii) wget Command

Use of Command:
The wget command is used to **download files from the internet** using a URL.

Aim: To download a file from the internet using the wget command.

Command:

wget https://example.com

Output:

--2026-10-07-- https://example.com/

Resolving example.com...

Connecting to example.com...

HTTP request sent, awaiting response... 200 OK

Length: ...

Saving to: 'index.html'

index.html 100%[==========>] ... saved

To check the downloaded file:

ls

Output:

Desktop Documents Downloads Music Pictures Videos index.html

Result: The wget command successfully downloaded the file from the specified URL.
