4. Execute and Display the Results of the Following Commands in Kali Linux Operating Systems

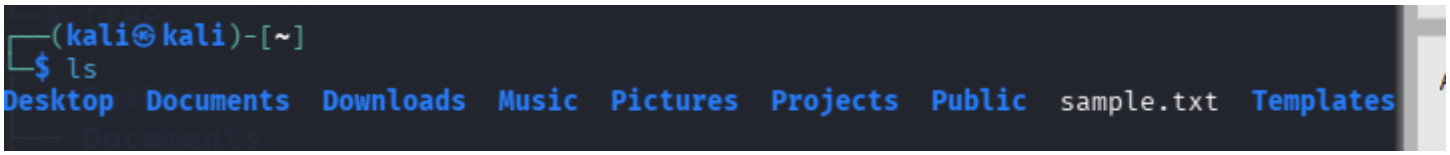

i) ls Command

Use of Command:
The ls command is used to **list the files and directories** present in the current directory.

Aim: To display the files and directories in the current directory.

Command:

Ls

Output:

Desktop Documents Downloads Music Pictures Videos

Result: The ls command successfully displayed the files and directories present in the current directory.

---

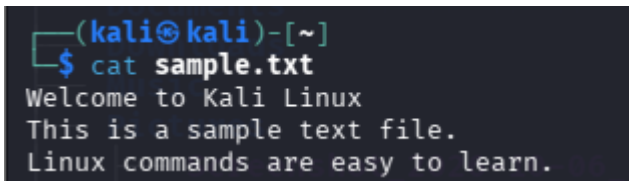

ii) cat Command

Use of Command:
The cat command is used to **display the contents of a file**. It can also be used to create and combine files.

Aim: To display the contents of a text file.

Command:

cat sample.txt

Output:

Welcome to Kali Linux

This is a sample text file.

Linux commands are easy to learn.

Result: The cat command successfully displayed the contents of sample.txt.

---

iii) mkdir Command

Use of Command:
The mkdir command is used to **create a new directory (folder)** in Kali Linux.

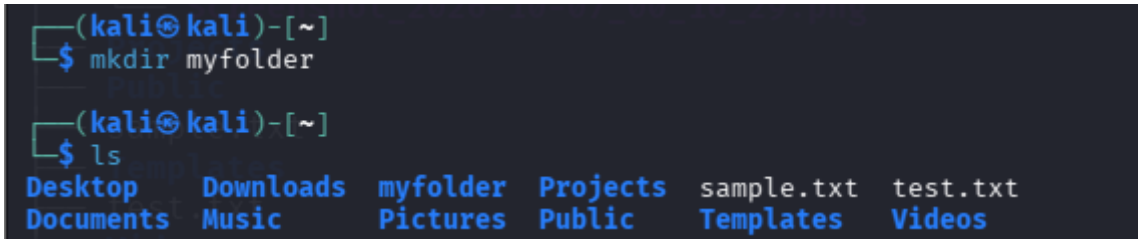

Aim: To create a new directory.

Command:

mkdir myfolder

To check whether the directory was created:

Ls

Output:

Desktop Documents Downloads Music Pictures Videos myfolder

Result: The mkdir command successfully created a new directory named myfolder.
