7. Execute and Display the Results of the Following Commands in Kali Linux Operating Systems

i) cd Command

Use of Command:
The cd command is used to **change the current working directory**.

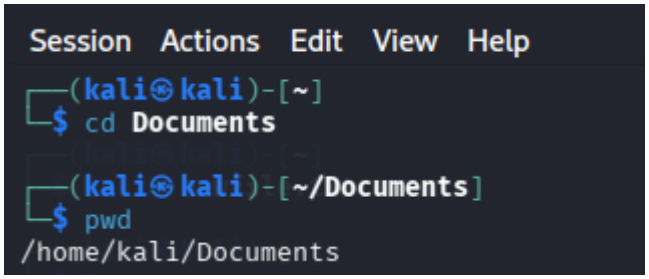

Aim: To change from the current directory to another directory.

Command:

cd Documents

To check the current directory:

Pwd

Output:

/home/kali/Documents

Result: The cd command successfully changed the current working directory to the Documents directory.

---

ii) cp Command

Use of Command:
The cp command is used to **copy files or directories** from one location to another.

Aim: To copy a file using the cp command.

First, create a file:

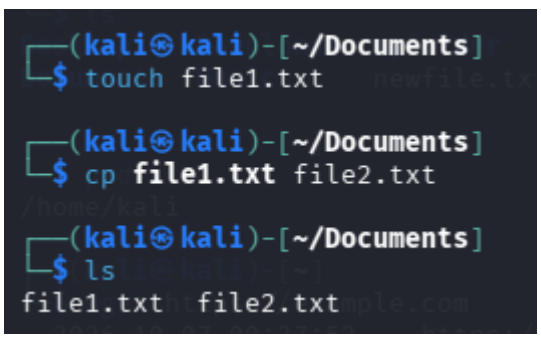

touch file1.txt

Copy the file:

cp file1.txt file2.txt

Check the files:

Ls

Output:

file1.txt file2.txt

Result: The cp command successfully created a copy of file1.txt named file2.txt.

---

iii) ls Command

Use of Command:
The ls command is used to **list the files and directories** present in the current working directory.

Aim: To display the files and directories in the current directory.

Command:

Ls

Output:

Desktop Documents Downloads file1.txt file2.txt Music

Pictures Videos

Result: The ls command successfully displayed the files and directories in the current working directory.
